

DATAFEEDS

Discover, process, and act on darknet data at scale

Integrate Darknet Data into your Critical Business Processes

Datafeeds provide a high-volume, live stream of data DarkOwl collects, providing content tailored to your specific needs. These feeds are provided at scale, and are designed to be readily integrated into your existing business processes and systems.

Datafeeds are comprised of millions of documents DarkOwl collects every day from the darknet and darknet-adjacent networks. Data from our collection is then safely delivered via a Secure Amazon S3 bucket, Azure or Google Cloud.

Custom Feeds

With Datafeeds, users can control which documents are included in the Feed, to focus on specific content and reduce noise.

DarkOwl Feeds currently support clients and use cases including:

Identify compromise of subscriber emails, credit cards numbers, or social security numbers

Receive all cryptocurrency addresses discovered on the darknet

Monitor for exposure of IP addresses owned by thousands of small- and medium-sized businesses

Assess supply chain or third-party vendor risk through darknet exposure

DARK OWL

Superior Darknet Data Powering Better Decisions

We illuminate the Darknet

DarkOwl is the industry's leading provider of darknet data. We offer the world's largest commercially available database of information continuously collected from the darknet, allowing our customers the ability to turn this data into a powerful tool to identify risk at scale and drive better decision making. Our platform tools allow users to parse and analyze the data for specific use cases, and our database is updated from tens of thousands of sites across multiple darknets every day.

DarkOwl is unique not only in the depth and breadth of its darknet data, but also in the relevance and searchability of its data, its investigation tools, and its passionate customer service. As importantly, DarkOwl data is ethically and safely collected from the darknet, allowing users secure and anonymous access to information and threats relevant to their mission. Our passion, our focus, and our expertise is the darknet.

Did You Know?

DarkOwl's vast darknet data adds value to our customers by allowing them to bundle our darknet data with other data sources such as social media and surface net. Any data aggregator without darknet data is not offering a comprehensive measurement of cyber risk/exposure.
