

DARKOWL

SCORE API

Calculate risk using darknet intelligence to determine exposure

Quantifiably Measure and Improve Darknet Exposure

DarkOwl's proprietary DARKINT Scores allow organizations to measure and identify darknet exposure with precise calculations. DARKINT Scores are an aggregated measurement of an organizations exposure across the darknet using multiple variables such as IP address, domain address, emails address and others factors.

Unique

DARKINT Scores are the first metric to comprehensively measure a company domain based purely on dark web intelligence.

Predictive

Score performance over time helps correlate rising or falling risk, as changes in DARKINT Scores reveal progress in hardened security, or conversely new breaches or data leaks.

Accessible

DARKINT Scores can be leverage via API or the Vision SaaS UI, and are delivered and updated in real-time.

Comprehensive

Sources informing DARKINT Scores include I2P, Tor, darknet marketplaces, Open FTP, underground forums, ZeroNet, Data Breaches, IRC, high-risk paste sites, and more.

GDPR Compliant

DARKINT Scores can be generated with privacy-compliant data points, and require only a company's website and/or email domain to calculate.

Superior Darknet Data Powering Better Decisions

We illuminate the Darknet

DarkOwl is the industry's leading provider of darknet data. We offer the world's largest commercially available database of information continuously collected from the darknet, allowing our customers the ability to turn this data into a powerful tool to identify risk at scale and drive better decision making. Our platform tools allow users to parse and analyze the data for specific use cases, and our database is updated from tens of thousands of sites across multiple darknets every day.

DarkOwl is unique not only in the depth and breadth of its darknet data, but also in the relevance and searchability of its data, its investigation tools, and its passionate customer service. As importantly, DarkOwl data is ethically and safely collected from the darknet, allowing users secure and anonymous access to information and threats relevant to their mission. Our passion, our focus, and our expertise is the darknet.

Did You Know?

Our data forms a critical additive dataset that helps paint the overall risk picture of any organization or domain's cyber risk. DarkOwl enables efficient and quick scoring of enterprises and organizations of their exposure in the darknet, and ongoing monitoring of that exposure. Indications suggest that these DarkOwl Scores correlate very well to cyber risk.
