

## SEARCH API

Integrate the power of DarkOwl's data directly into your existing technology

```
+ "ccn": [ ... ],  
+ "ssn": [ ... ],  
+ "email": [ ... ],  
+ "emailDomain": [ ... ],  
+ "ipAddress": [ ... ],
```

### Access Large, Specific Darknet Data Sets

If your use case for darknet data utilization requires large export of search results for analysis, including correlation with OSINT data, the DarkOwl Search API is ideal. The Search API allows you to integrate darknet data directly into your existing technology or platform. The Search API queries the entirety of the DarkOwl dataset, including 8+ years of preserved and searchable archive.

#### Search Endpoint

Search API allows you to query DarkOwl's unparalleled darknet dataset, using a variety of query parameters including wildcards, regex and Boolean logic and operators, proximity, DARKINT Scores, and response options including individual documents or up to 100 characters around your search term.

#### Comprehensive

Sources span multiple intelligence points, including I2P, Tor, darknet marketplaces, Open FTP, underground forums, ZeroNet, Data Breaches, IRC, paste sites, high-risk surface web, and more addresses belonging to a certain type of major cryptocurrency.

#### Automated Features

With Search API you can save your searches to automatically run on a schedule and alert profile you specify posted.

#### Clear Documentation

Access Search API resources & additional details.

#### Filters

Search natively in 47 languages, create powerful, targeted searches with Boolean operators, regular expressions or filters, retrieve full text document results, as well as associated metadata including source URL/URI and entities.

# DARKOWL

Superior Darknet Data Powering Better Decisions

## We illuminate the Darknet

DarkOwl is the industry's leading provider of darknet data. We offer the world's largest commercially available database of information continuously collected from the darknet, allowing our customers the ability to turn this data into a powerful tool to identify risk at scale and drive better decision making. Our platform tools allow users to parse and analyze the data for specific use cases, and our database is updated from tens of thousands of sites across multiple darknets every day.

DarkOwl is unique not only in the depth and breadth of its darknet data, but also in the relevance and searchability of its data, its investigation tools, and its passionate customer service. As importantly, DarkOwl data is ethically and safely collected from the darknet, allowing users secure and anonymous access to information and threats relevant to their mission. Our passion, our focus, and our expertise is the darknet.

### Did You Know?

Our financial clients have benefited from having visibility into potentially compromised information including, Bank Identification Numbers (BINs), credit card numbers, bank statements, payment application login credentials, among many others. The Entities API makes it easy to search by type of cryptocurrency, and for specific crypto wallets.
